1. The following is an examiner's statement of reasons for allowance: While other recording layers having thicknesses in the recited range are of record, these all have higher concentrations of the dyes to offset the reduced thickness and so teach away from the claimed invention which would have a low absorption. The prior art of record groups the dyes together to achieve a high absorbance and sensitivity, and is unconcerned with the fluorescence and so has no motivation to use the combination of low concentration and thickness. For the bilayer embodiments of claims 8 and 9, the presence of the second dye together with the remaining limitations is not rendered obvious by the prior art of record. The embodiment of claim 7 is allowable primarily on the basis of the microcapsule limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Martin J. Angebranntdt whose telephone number is 571-272-1378. The examiner can normally be reached on Monday-Thursday and alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on 571-272-1385. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
